Subject: Supporting submission for Barrytown Sands Mining by TiGa

Caution! This message was sent from outside your organization.

Hello,

I would like to make a submission to the West Coast Regional Council and the Grey District Council in support of the Barrytown Sand Mining Application by TiGa.

I believe that there is sufficient wider community and global long term benefits to offset any perceived negatives that some people feel they may incur.

The perceived negatives are for a much shorter period than the benefits would provide for.

In my view the perceived negatives some people are stating are not that onerous compared to the benefits that the sands will provide.

This mining activity is going to result in a lot of good for a lot more people than any perceived negative effects will cause and any perceived negative effects will be for a lot shorter period.

People who feel they are going to be negatively impacted need to suck it up for the greater good.

Yours sincerely,

Paul Schramm
